

Polymer Test:

Single page application in Polymer with a search field on top to find all tweets with a particular #tag, which auto refresh in 5 seconds (time is configurable to minimum of 2 seconds). Here are detailed requirement

1. Single screen to show list of tweets where all @ and # are hi-lighted tapping on any #tag should make a new search with selected tag
2. Right navigation bar button to change refresh setting which can be any one from {No Refresh, 2 Seconds, 5 Seconds, 30 Seconds, 1 Minute}
3. Button to refresh the search if its not auto refresh
4. Load more when user is at bottom of screen
5. Decent UI to show tweet, at least showing tweeted by and re-tweet count.

Upload the Code to Github/Bitbucket and share it with us. Ensure you cover:

1. For each components: demo page, test using web component tester
2. bower.json to manage your dependencies
3. We will use polymer-cli to serve and build your code
4. If you have extra build scripts, please use gulp

You will be judge by:

1. Break up of components in the single page app
2. Knowledge of Polymer (efficient use of polymer, etc).

Bonus: Make the web app to be a Progressive Web Application and works offline with service worker.
